

**THE NATIONAL SPACE SOCIETY'S
21st Annual
International Space Development Conference
ISDC 2002**

“Settling The Solar System”
Tech Center Marriott Hotel, Denver, Colorado
May 23 - 27, 2002

CALL FOR PAPERS

“To Create a Spacefaring Civilization”

The mission of the National Space Society formally describes our members' motivation for belonging to the Society: we want to live and work in Outer Space. Every year for the last 20 years, we have gathered at our annual International Space Development Conference to listen to professional speakers, develop strategies for furthering our goals, and to enjoy the company of others who attend the conference. In 2002 the Society will hold its 21st conference, one mile high, in Denver, Colorado. The theme of the conference is “Settling the Solar System.” In keeping with the theme of the conference, we are inviting prospective speakers to submit abstracts on the following topics: Robotics, Nanotechnology, Entrepreneurs, Launch Vehicles, Orbital Applications, Launch Facilities, Many Roads to Space, Space Mining, Space Construction, development and settlement of the Moon, and development and settlement of Mars. Please keep your paper very specific. Do not make your topic generic or wide sweeping. Remember, you will only have 20-25 minutes to present your paper. We are also inviting submission of abstracts in the fields of Space Medicine, Space Law, Space Business and Military Space. These topics will be addressed in a one-day professional symposium on Friday, May 24, 2002. We hope you will consider joining us in Denver and submit an abstract for our consideration.

Complete the following form, attach your abstract (200 words maximum),
include a one paragraph bio or resume, and mail to:
ISDC 2002 Abstracts, PO Box 1848, University, MS 38677-1848
